VALLIS PEBBLE

NEW COLOURS

VALLIS COLLECTION

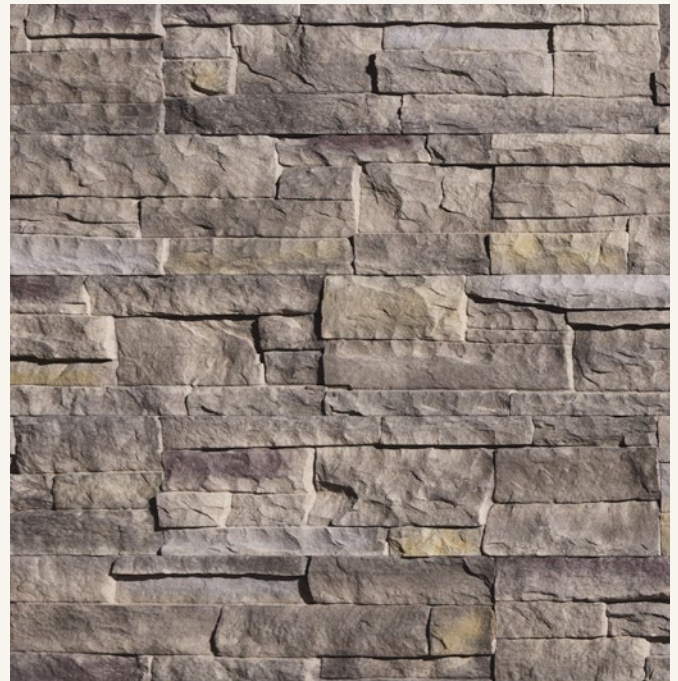

The Vallis collection, renowned for its dry-stack, elongated, and contemporary look, just found two new ways to express the soul of nature. Willki is proud to introduce Dune and Forge, two curated palettes that offer greater design flexibility while staying true to the raw beauty of natural stone.

DUNE

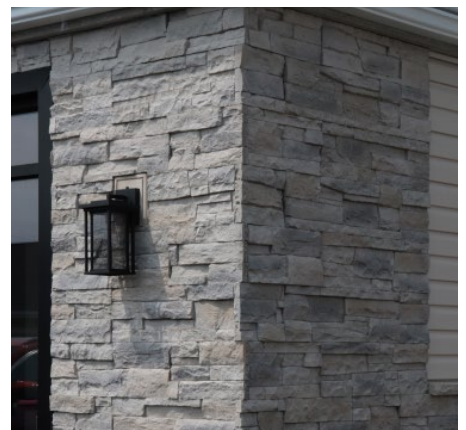

A canvas of luminous, pale stones delicately interwoven with subtle, warm brown accents. Dune evokes the tranquil beauty of desert sands, bringing an air of calm, organic sophistication to any space. It's the perfect blend of lightness and understated warmth.

FORGE

Inspired by the elemental strength of nature and the warmth of a craftsman's hearth, this dramatic palette layers rich, dark browns with striking golden and mineral accents. Forge brings tactile depth and an unmistakable artisanal character to modern architecture.

WILLKI Installation Guide

CHARACTERISTICS

↗ Versatile

- Installs both indoors and outdoors
- Installs on most substrates, year-round
- Does not require a footing or lintel
- Integrated corners
 - No additional corner pieces needed
 - Same panel makes inside and outside corners
 - Exposed textured ends for wall/column corners
 - Guaranteed colour match

↗ Reversible panels

- Groove for anchor keys is found on the top and bottom of each panel
- Allows reuse of cut pieces at different locations on the project, reducing waste to less than 5% and providing greater application versatility
- Minimizes waste when installing stone on a gable

↗ High-end look

- Panels screwed at a 45° downward angle: allow for a tight fit to minimize the appearance of horizontal joints
- Beveled ends: ensure perfect contact between the front faces of the panels, reducing the appearance of vertical joints

↗ EziKi anchor key system

- Creates an air space behind the panel (0.5 in / 12 mm), ensuring ventilation and moisture management

↗ Eco-responsible

- Lightweight concrete composed of over 70% recycled materials

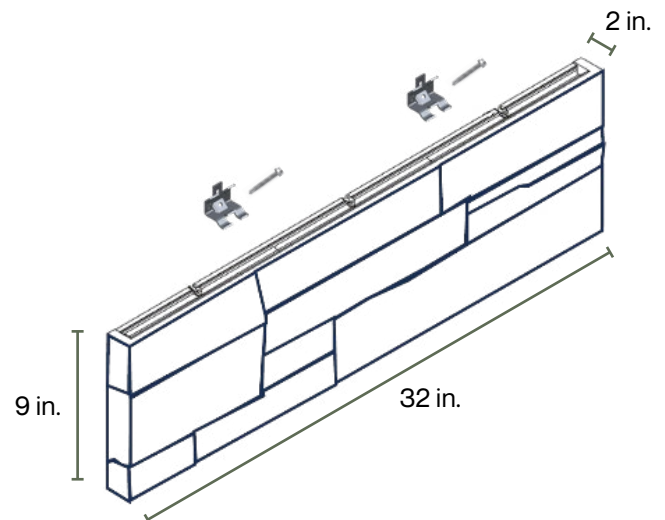

↗ Durable

- 50-year limited transferable warranty
- Integrated colour: will not fade over time

↗ Dimensions: 32 in x 9 in x 2 in

Area: 2 square feet

Weight: ± 12.5 lbs / sq.ft.

BEFORE/AFTER

Willki screw-on stone panels are ideal for renovations, as they allow to transform a home quickly and easily while providing a natural stone look at a lower cost. Without the need for a structural foundation, footing or lintel, they are suitable for a variety of projects, both indoors and outdoors. Willki stone meets the needs of homeowners looking for a practical and modern solution to enhance the appearance of their home.
