With the CLIPS acronym, remember the features that make the Willki architectural stone system unique and versatile.

Corners are integrated

- Only 1 sku, colour match guaranteed

Lightweight

- 30% lighter than regular concrete, eco-friendly (> 70% recycled materials)

Installation on most substrates

- Indoors, outdoors, on most substrates, 12 months a year

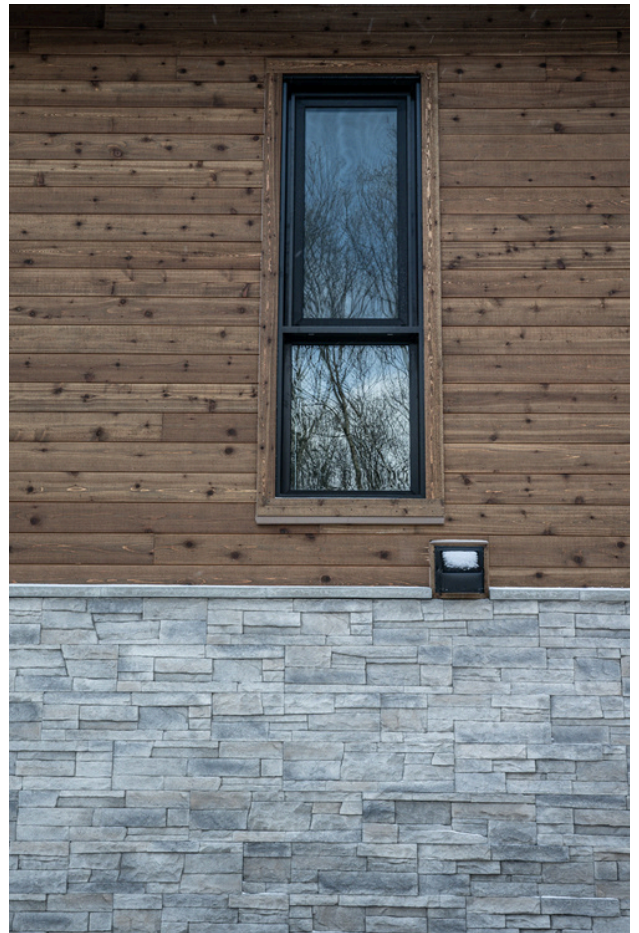

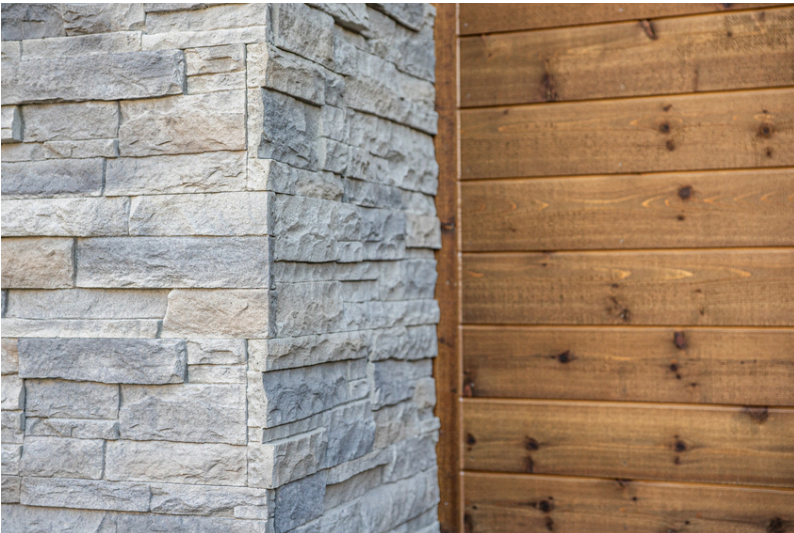

Panels are reversible

- Groove for anchor keys on top and bottom of panels, reduces waste

System of anchor keys - EziKi

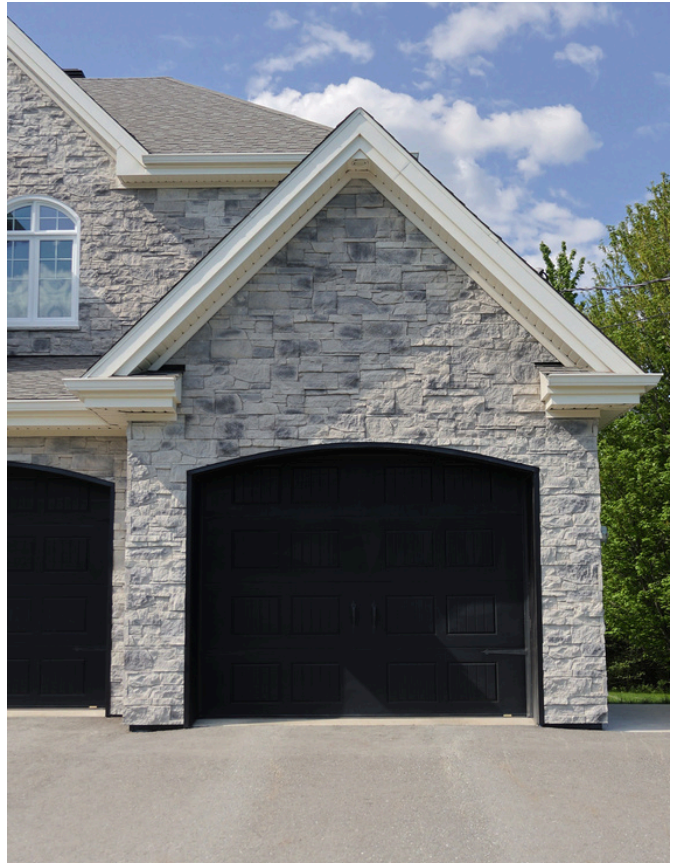

- Creates an air space behind the panel, favors ventilation and moisture management

CHARACTERISTICS

↗ Versatile

- Installs both indoors and outdoors
- Installs on most substrates, year-round
- Does not require a footing or lintel
- Integrated Corners
 - No additional corner pieces needed
 - Same panel makes inside and outside corners
 - Exposed textured ends for wall/column corners
 - Guaranteed colour match

↗ Reversible panels

- Groove for anchor keys is found on the top and bottom of each panel
- Allows reuse of cut pieces at different locations on the project, reducing waste to less than 5% and providing greater application versatility
- Minimizes waste when installing stone on a gable

↗ Eco-responsible

- Lightweight concrete composed of over 70% recycled materials

↗ High-end look

- Panels screwed at a 45° downward angle: allow for a tight fit to minimize the appearance of horizontal joints
- Beveled ends: ensure perfect contact between the front faces of the panels, reducing the appearance of vertical joints

↗ Durable

- 50-year limited transferable warranty
- Integrated colour: will not fade over time

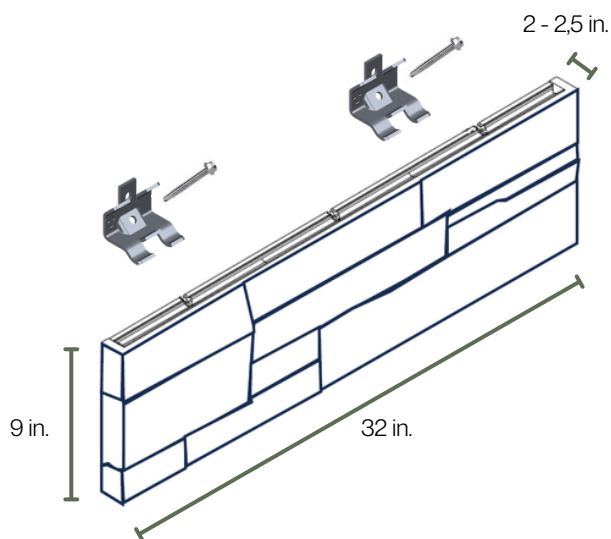

↗ Dimensions: 32 in x 9 in x 2 in

Area: 2 square feet

Weight: 12 lbs / sq.ft.

↗ EziKi anchor key system

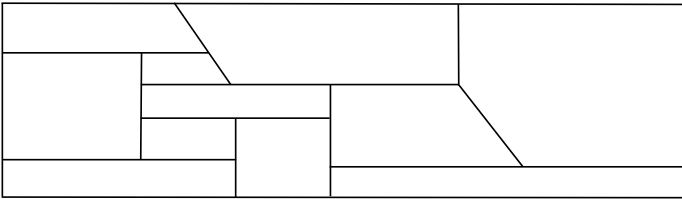

- Creates an air space behind the panel (0.5 in / 12 mm) ensuring ventilation and moisture management

COLLECTIONS

ARBOR

Inspired by traditional fieldstone, the Arbor profile showcases large, irregular stones and pronounced depth, creating a rustic and warm aesthetic with timeless natural character.

Umbra

Obsidian

Granite

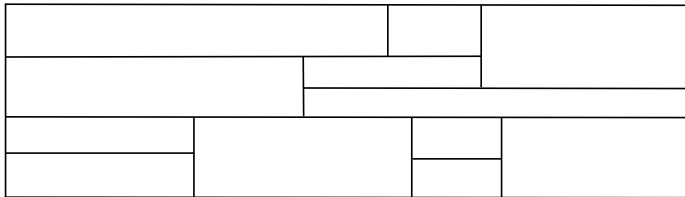

Pearl

VALLIS

The Vallis profile embodies contemporary elegance. Defined by sleek, elongated stones and clean lines, it creates a refined, structured look, perfect for modern projects, both indoors and outdoors.

Coal

ACCESSORIES

For a flawless, cohesive finish, Willki offers a range of carefully designed accessories that integrate seamlessly with our screw-mounted stone panels, whatever your project may be.

Transition Sill

Facilitates the transition between the stone wall and another siding of choice.

Window Sill

Allows a harmonious finish under the windows.

Finishing Trim

Offers a possibility to outline the openings such as doors and windows. Is also used to finish the sides of a facade installation.

Electrical Box

Allows the installation of an electrical outlet or a switch.

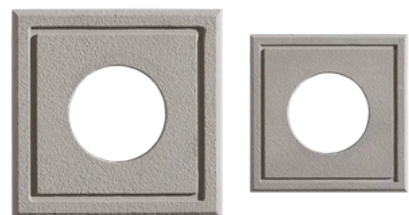

Light Box

Allows the installation of a lamp.

Universal Boxes (4 and 6 in.)

Used for a better finish around dryer outlets, vents, air intakes, and others.

NERO

GRIGIO

CREMA

Recommended Colour Match

NERO

- Arbor Obsidian
- Arbor Granite
- Vallis Coal
- Vallis Platinum
- Vallis Gabbro

GRIGIO

- Arbor Umbra
- Arbor Granite
- Vallis Pebble
- Vallis Platinum
- Vallis Gabbro

CREMA

- Arbor Pearl
- Vallis Pebble
- Vallis Jasper

INSTALLATION

Installation in 3 easy steps:

1. Install the starter strip

2. Stack the panels, place 2 Eziki anchor keys in the groove of each panel, then screw

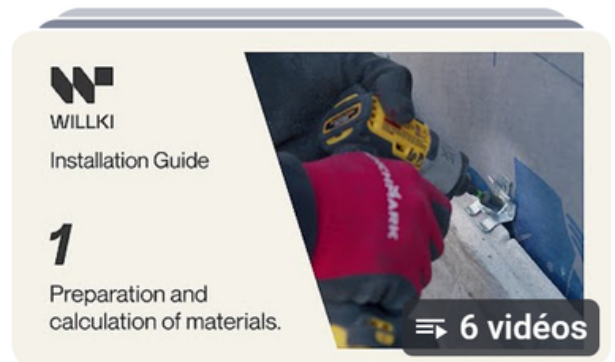

3. Finish with accessories (sills, trims and finishing plates)
